McCutchan F.E.;
M. Culster of HIV type 1 subtype C sequences from Ethiopia, observed in full genome analysis, is not sustained in subgenomic regions.";
AIDS Res. Hum. Retroviruses 19:1125-1133(2003).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Hadyan S., Zeira M.;

Maayan S., Zeira M.;

Maayan S., Zeira M.;

Maayan S., Zeira M.;

Maayan S., Zeira M.;

Submitted (MAR-2003) to the EMBL/GenBank/DDBJ databases.

-1- SIMILARITY Belongs to peptidase family A2.

"Modecular cloning and phylogenetic analysis of human immunodeficiency virus type I subtype C: a set of 23 full-length clones from Botswana.",

J. Virol. 73:4427-4432 (1999).

-! SIMILARITY: Belongs to peptidase family A2.

EMBL, AFI10967, AAD17072.1; -.
